Hi - I'm having problems using cgHistoPlot in a re-sizable graphics window.

For example,

```
cgWindow, xysize=xSize, yysize=ySize
cgWindow, 'cgHistoPlot', data, binsize=1., LOCATIONS=locs, HISTDATA=hists, /LoadCmd
HELP, locs, hists
cgWindow, /ExecuteCmd
```

Yields,

LOCS            UNDEFINED = <Undefined>

HISTS          UNDEFINED = <Undefined>

There is an old post referring to what looks like a similar problem; is there a simple way around it?

Thanks, Barry
