Thanks a Lot Nata...
but now I have this problem

```
% Compiled module: MODIFYCT.  
% Variable is undefined: ITAB.  
% Error occurred at: MODIFYCT      83 /usr/local/itt/idl71/lib/  
modifyct.pro  
%      $MAIN$  
% Execution halted at: $MAIN$
```

Thanks a lot
