Hello all, I am getting this error message when i attempt to .run my procedure compare_target_offset2

Compiled module: COMPARE_TARGET_OFFSET2.

% Compiled module: \$MAIN\$.

% DC_WRITE_FREE: Variable is undefined.

and the same for DC_WRITE_FIXED, when I try to write my data in a variable to a .txt file. These two functions should be in the pv wave library - I have version 9.00.

here is how I use it within the code:

```
status= DC_WRITE_FREE('C:\Cryo\SphereCenterData  
\referencetargetdata.txt',rtar)
```

I apologize now if it's a silly mistake. Thanks!
