Sorry, I just realized it's not the map that is doing this, it is the image!

```
im = IMAGE(scaledData, x, y, RGB_TABLE=rgb, $  
  POSITION=[0.1,0.1,0.9,0.9])
```

This image is not going into this position. The map is going over the top of the image. Is there a way to get the image to honor the POSITION keyword?

Cheers,

David
