FASTLINK SOFTWARE UPDATE

#####

Volume 3, Number 2 * February 1, 1997

This weekly update reports on ALL new software that has appeared on the internet in the past week. This update covers all software sources, depots, publishers, and others.

All software has been downloaded and verified and all links for downloading software have been fully verified to be active and working during the week of this report. FastLink editors spend hundreds of hours checking and comparing all sources so you don't have to.

NOTE: If you do not wish to spend the hours necessary to download programs you are interested in, all these programs, plus hundreds more can be purchased on CD-ROM for as little as \$6.95. Every month, all new programs are compiled onto CD-ROM. All the programs can be easily found and installed, and are presented in 3D VRML2, and HTML for easy access. More details can be obtained by going to: <http://www.symgroup.com/ng/> or EMail our autoresponder at cd-info@symgroup.com for details.

1. INTRODUCTION

1. INTRODUCTION

#####

Welcome to another edition of the FastLink Software Update - an e-mail newsletter published every week with the sole purpose of informing Web surfers of the latest and best PC software available on the Internet.

In each concise description you'll find the program title, latest version number, publisher, summary, web site, size, and operating system and location where to download the program.

NOTE: If you do not wish to spend the hours necessary to download programs you are interested in, all these programs, plus hundreds more can be purchased on CD-ROM for as little as \$6.95. Every month, all new programs are compiled onto CD-ROM. All the programs can be easily found and installed, and are presented in 3D VRML2, and HTML for easy access. More details can be obtained by going to: <http://www.symgroup.com/ng/> or EMail our autoresponder at cd-info@symgroup.com for details.

EXPRESSION CALCULATOR 2.31

This is not just another calculator. It performs all and more operations you'll ever need on a calculator, it is a full expression analyser, stacked signed parenthesis, algebraic priority and functions aware. It brings the power of your multitasking environment allowing to execute a virtually infinite number of long operations at the same time such as prime numbers generation. Operations are done with extended numbers (-3.4×10^{4932} .. 1.1×10^{4932}). Still some operations' results are limited by 2^{32} , anyway, 1500! is not just possible, but the result is almost immediate since most powerful algorithms have been used. The Expression Calculator can perform decimal operations in degrees and radians, as well as hexadecimal, octal and binary integer calculations and conversions.

ANIMAGIC .95

Animagic GIF is a simple yet powerful GIF animation tool. It produces output files that are 10% to 60% smaller than non-optimized GIF's and builds animations from individual frames or from existing animated GIF's. Users can easily control loops, frame rate, transparent color, copy/cut/paste frames, add/delete comment frames and more. All of that can be done without any knowledge of GIF format (no need to know about graphic control blocks, extension blocks and other low level parameters).

PUBLISHER: Right to Left Software
DOWNLOAD AT: <http://rtlsoft.com/animagic/index.html>
SIZE: 390 KB

CD/SPECTRUM PRO 3.0

CD/Spectrum Pro is a 32bit shareware CD-Audio Player with Graphical Spectrum Analyzer for Windows 95 and Windows

NT 4.0 (also known as 'Shell Update Release' or 'SUR').
CD/Spectrum Pro has two independent parts: The CD-Audio player and the spectrum analyzer. The CD-Audio player has almost every feature you can find on any software CD player - programmed mode, intro mode, optional taskbar icon

operation, auto-play, auto-exit, auto-eject, artist/track/title database, etc. It also recognizes CDP files which can save you from typing in all the track/title information for your CDs. The spectrum analyzer graphically depicts the frequency spectra of the CD music in real time. (Unless you don't have a Pentium, in which case it is *almost* real time <g>)

COOL EDIT 96

Cool Edit is a digital sound editor for Windows. You might think of it as a paint program for audio- just as a paint program enables you to create images with colors, brush strokes, and a variety of special effects.

Cool Edit enables you to "paint" with sound: tones, pieces of songs and voices and miscellaneous noises, sine waves and sawtooth waves, noise, or just pure silence. Cool Edit also gives you a wide variety of special effects to "touch up" your sounds: reverberation, noise reduction, echo and delay, flanging, filtering, and many others. It's like having thousands of dollars' worth of professional audio equipment all in one easy-to-use software package.

RHINO 32

Rhinoceros or "Rhino" is a conceptual design and modeling tool for industrial, product, and scene designers. Whether you build heart valves or ship hulls, packaging or gears, Rhino is an easy-to-learn-and-use, flexible, and accurate modeler. You can create, edit, and render any combination of freeform curves, surfaces, and solids. You can then export your model to down stream processes. Rhino objects are smooth NURBS (non-uniform rational B-splines) curves and surfaces rather than line segments or polygon meshes. Rhino brings the full power of the AGLib NURBS modeling technology to Windows for the first time. Rhino's robust spline-based models can be used in most rendering and animation products, including 3D Studio MAX, Softimage, and LightWave 3D.

CLIPMATE 4.2.0

An answer to the age-old question: Isn't there a better way to cut and paste in Windows? The native clipboard in Windows is great for cutting and pasting a single item at a time, but if you want to move a series of items, or save items for later use, then you need ClipMate! ClipMate enhances the native clipboard functionality by remembering all items (both text and graphic) that are copied to the clipboard and storing them in "collections" for later pasting into other applications. Powerful tools enable users to retrieve, append, print, reformat, and edit data. An exclusive PowerPaste feature puts ClipMate in "rapid fire" mode, allowing quick pasting of a series of items into an application. With ClipMate as a Windows companion, users will never accidentally lose a piece of clipboard data again.

SEARCH32 2.0

Search32 text retrieval system provides you a special "search engine". Developed on Anet's unique algorithm, this engine, like those used by Yahoo and Infoseek, does not scan the whole disk. Instead, it browses preprepared "index files". These index files contain information about every word in every text file. Result? Superfast search results showing text strings and file names! Files easy to identify and open one by one. It's fast. taking only 90 seconds to index 15 MB of text, there are no size limitations, and it is inexpensive.
