No, coyote_library_1.12.6 will.

> Your library is part of our repository as well and, as such, I'd rather provide a tagged version
than one from trunk.

> The last tagged version mentioned on your project page is v1.11.0 (from 03 March)

Yes, you are having me tag these so often, I would have to
get paid double my current salary to spend my time updating
the project page. I now have Twitter, Facebook, and Google +
to keep up with, too!

> p.s. I really like the "Issues" page on your google code site. Of the
idl-coyote project it states: "This project

> currently has no issues." Man... I lay awake at night dreaming about reaching that stage with
my software projects.

Well, I think it should say "no issues I feel like dealing with at
the moment." I tend to fix any issue in less time than it takes
me to write about it, which probably explains the overly aggressive
tag releases. :-)

Cheers,

David
