Folks,

A couple of programs in the Coyote Library have been updated today, but one of general importance is cgHistoplot.

By user request, I have added a SMOOTH keyword that will allow you to apply the IDL Smooth function to the histogram data before it is plotted.

I have also fixed a problem that prevented cgHistoplot overplotting in cgWindows. (A Carriage Return had gone missing.)

And, I fixed a problem in how the last histogram bin was drawn when using the OUTLINE keyword.

The updated program can be found here:
