Subject: Subscription 'daily digest' problems?

Hi all,

Apologies if this has been addressed before--I did not spot anything.

I've been subscribing to this group for some years, getting a daily digest update. Some months ago, the digest stopped coming (it did not click until more recently, as I get a lot of emails each day).

I checked my subscription preferences and they were still set to 'daily digest'; I changed it and changed it back again, and I still haven't been receiving a digest. Is this a known issue with the group, or something specific to my end--and if the latter, any thoughts on resolving it?

(I have checked that e.g. my email account is correct, and it's not going to spam folders; I didn't change anything about my group membership, the emails just stopped coming in one day.)

Any insight would be appreciated!

Thanks,

Andy
