Subject: using wave widgets...motif and wave
Posted by Gary Leydon on Mon, 17 May 1993 22:17:32 GMT

Hi,
 I'm playing around with wave widgets on a VMS 5.5 system and pvwave
cl version 4.01. I'm wondering if using the Wt toolbox and/or wave
widget toolbox
is worth the effort. Has anyone done much with this and care to share
your
opinions? I'm beginning to think I should be going the other way...e.g
call wave
cl from my c program which handles all the motif stuff...that way I get
access to
all the motif convience routines not just the widgets. I'd like to see
some example code that would show how you tell wave (from a c program
using motif) to handle the drawing and updating from say a drawing area
widget.

thanks for any input
