Dear all

I use IDL under windows 7 64bits (the idl is also the 64 bits version)

I want to read frames from mpeg files

I have found KRSgrAVI,

when i try to execute the program i am getting the message

OBJ_NEW: Error loading sharable executable.
        Symbol: IDL_Load, File = C:\Program Files
\..............................\krsgravi\KRSgrAVI.dll
        %1 is not a valid Win32 application.

I can understand that this has something to do with the 64 bits
windows version i have

Can you please help me?

any other program that can read avi files for 64bit windows??

Thank U in advance
