Thanks Fab.

I tried GRIDDATA, but it works only for interpolation of surfaces, i.e. it recomputes $f(x,y)$ from $(x1,y1)$ coordinates to $(x2,y2)$ coordinates. What I need is resampling a 1D array of data values, initially binned on a $x1$ values, to $x2$ values. (with both $x1$ and $x2$ being two different irregular grids).

Cheers
