Hi,

I am a PhD student in medical image filtering and waiting for my thesis defence in 20 February 1997.

Since I am immigrating as a skilled immigrant to Canada, I need a job in this field there. If there is a possibility, please be kind enough to let me know, so that I can do the necessary arrangements. I am leaving to Toronto in the first week of March. I have used Pv-Wave/IDL on SUN for my research in 2D image filtering and GUI development. I can write C/C++ codes as well.

Thanks

M. Sooriyajeevan
