Hi,

I was wondering if the "sun symbol" issue could have been solved by anyone.

It's been a while that I try to make it work using hardware font for postscript device (e.g. D. Fanning's ps_start, font=0). The solutions for this kind of font available on google (e.g. ps_frag.pro, changing the unicode in /itt/resources/fonts/, etc) are not very satisfactory because not quite user-friendly...

So, if a good solution has been found, please let me know! ;)

Cheers,
Bing
