Folks,

The repercussions of Paul mentioning his experience with Coyote Graphics a week ago go on and on. From the mail bag today:

"I would like to thank you for writing this wonderful book on IDL. It really helped me a lot in my research attachment! And my supervisors are often surprised by the quality of my IDL plots! Buying this book is one of the best investments I have made! :D"

You, too, could gain favor and prestige with your supervisors! ;-)

Cheers,

David
