Hello David

Thank You very much

The problem is I was facing at the time is that the Linear line is not going through the points as I expected, I thought it is the function problem, but later i found where the bug is. Here is my code for plotting the LINFIT

```
format = LABEL_DATE(DATE_FORMAT=['%M%Y'])
Trend_Coeff = LINFIT(Date,Region4)
YFIT = Trend_coeff[0] + Trend_coeff[1]*Date
Date = julday(N,0,Y)
cgoplot,Date,YFit,color='red',linestyle=2,thick=2,/addcmd
```

Guta
