Hello,

i have troubles with call_function under UNIX...

```
call_function('my_function',1)
```

and in IDL_PATH reachable areas i have the file:

```
my_function.pro
```

on calling it i receive the error:

```
no such function/procedure MY_FUNCTION
```

under VMS i havent got this trouble...
as VMS is not case_sensitive

any hints/patches

Panther

PS: findfile is somehow strange too under unix...
