Hi guys,

Could you explain this ?

help, azimuth

```
AZIMUTH      LONG      =      34
```

```
x1=ww[pos] MOD sz_proj[0]
```

help, azimuth, x1

```
AZIMUTH      LONG      =      143
```

```
AZIMUTH      LONG      =      143
```

help, ww, pos, sz_proj

```
WW           LONG      = Array[45]
```

```
POS          LONG      =      0
```

```
SZ_PROJ      LONG      = Array[2]
```

LOL !!!!!!!!
