Someone knows how to hide the auto progress bar ?

Available parameters:

BACKGROUND
CANCEL
DEGREE
DIMS
FID
GCP_NAME
GRID
INVISIBLE
JUST_COMPUTE
OUT_BNAME
OUT_NAME
O_PIXEL_SIZE
O_PROJ
O_ROTATION
POS
RESAMPLING
RTITLE
R_FID
WARP_METHOD
ZERO_EDGE

I suspected of INVISIBLE and JUST_COMPUTE.

Tried :

```
/INVISIBLE  
INVISIBLE = 0  
INVISIBLE = 1
```

But no success, the progress bar it still coming up.
