Subject: Is IDL 8.2 Workbench Slow, Too?
Posted by David Fanning on Fri, 14 Sep 2012 13:11:02 GMT

Folks,

Alright, I expect IDL 8.2 function graphics routines to be
slow. But, is the Workbench slow, too?

I was just editing a file, and I hit the Compile button.
I had to wait for about 10-15 seconds for something to
happen. I've noticed this delay a LOT. Yesterday, in fact,
I rebooted my machine, thinking maybe something was
wrong there. I even ran a virus scan to be sure I hadn't
been infected with something.

Has anyone else noticed this?

Cheers,

David
