I think you have to write your loop like this, using
the SetCurrent method on the window you want to draw
into:

```
    w.SetCurrent
    index++
    pn = PLOT( $
      channel_index, new_data, $
      XTITLE=xtitle, $
      TITLE = item_name[j], $
      LAYOUT = [ n_col, n_row, index ], $
      NAME = legend_name[0], $
      COLOR = 'red', $
      THICK = 2, $
      CURRENT = 1 )
```

Cheers,

David
