I think you have to write your loop like this, using
the SetCurrent method on the window you want to draw
into:

```
w.SetCurrent
index++
pn = PLOT( $
  channel_index, new_data, $
  XTITLE=xtitle, $
  TITLE = item_name[j], $
  LAYOUT = [ n_col, n_row, index ], $
  NAME = legend_name[0], $
  COLOR = 'red', $
  THICK = 2, $
  CURRENT = 1 )
```

Cheers,

David
