>> I have two plot setups, and from what I can tell, the eps files should come out with plots exactly the same physical size, BUT of course they are not. Can anyone tell if I am missing something simple, or if there is a work around? I believe the first set of code produces plots about 1 square centimeter larger than the second code (for some reason that was not the case earlier this week, they matched nicely).

Oh, wait, you are doing multiple plots. Yeah, you're hosed unless you use the same Character sizes. :-)

Cheers,

David
