Subject: Re: contour plots on map with Coyote Graphics System in postscript
Posted by Alexandra Laeng on Tue, 02 Oct 2012 23:13:43 GMT

Dear David,
thank you so much for your (as always) fast response.

I would have two further questions.
1. What if I do not need to create a resizeable graphic window - I just want to create PostScript file containing the filled contour plot on the map.
2. Ideally, I need multiple panels, each on its own copy of the map. Would your procedure work by just setting !p.Multi varialbles?

Sincerely
Alex
