Well, this is embarrassing...

Yesterday was pretty chaotic, so in my haste to do what I
had to do, I apparently failed to include the Coyote directory
on the list of directories I was grepping for "retired"
Coyote programs.

In any case, quite a few instances of PickColorName and a
few of FixPS were missed. I've fixed this and updated the
libraries again this morning. Sorry for the confusion.

Cheers,

David

P.S. Let's just say as soon as Coyote gets here (he's late!)
I'm going to fire his sorry ass--again!

Here is one of my favorite poems by David Ignatow.

        Self-Employed

 I stand and listen, head bowed,
 to my inner complaint.
 Persons passing by think
 I am searching for a lost coin.
 You're fired, I yell inside
 after an especially bad episode.
 I'm letting you go without notice
 or terminal pay. You just lost
 another chance to make good.
 But then I watch myself standing at the exit,
 depressed and about to leave,

and wave myself back in wearily,
for who else could I get in my place
to do the job in dark, airless conditions?
