The google repository browser. I just tried again and I see why I can
only see bits and pieces of your tag directories. When I click on
tags->coyote it lists a bunch of directories, but at the top it says
"Sorry, truncated results. Use command line tools for complete view"

On my screen, no 2.x or 3.x tagged version are visible if I use
   https://code.google.com/p/idl-coyote/source/browse/#svn%2Fta gs%2Fcoyote

When I go directly to the repository URL I see everything,
   http://idl-coyote.googlecode.com/svn/tags/coyote/

Phewph. I thought I was going nuts.
