> Hi all, I am new to IDL, sorry if this question is too simple...I however need assistance. I have SST datasets that I want to read in and loop. I have managed to read in the HDF global dataset but now I want a to loop months. The objective is to get values for a fixed point for a number of consecutive months.

Your question is not too simple. It is too nebulous.
No one will know how to answer it.

Here is a good article that will help you ask questions that have a good chance of getting answered. Pay particular attention to the section on "being precise and informative about your problem".
