> hm... i get the same error. what i have is: 2 procedures i wrote which work. instead of using two different files for each procedure, i want one file where i can choose the one procedure i like. lets call them proc_one,a,b,c and proc_two,d,e,f. i tried it like the following:

>

- > read,rot,prompt='rot via proc one or two? (proc_one,proc_two)'
- > case rot of
- > 'proc_one': call_procedure,proc_one,a,b,c
- > 'proc_two': call_procedure,porch_two,d,e,f
- > endcase

>

> maybe this is not very clever but i have no idea how to do it in another way

Well, there are a LOT of things wrong with this approach, probably, but I would start by putting your two procedures in two separate files, named correctly:
