> I know I can use ps_start and ps_end, but I would like to know if there is a way that allows me
to visualize the plot on x window and to print to eps at the same time.

I would do it this way:

```
cgplot, x, y, /window
```

```
cgplot, x, t, /overplot, /addcmd
```

```
cgcontrol, output='out.eps'
```

Cheers,

David
