Subject: What is "DUMP"?

Greetings

  While working in IDL 4.0.1 running under Win95, I noticed that the
editor had highlighted the word "dump" (which I had planned to use
for a temporary variable). Out of curiousity I tried typing it in at the
command line, and it was quietly accepted. However, the online
documentation does not mention a "DUMP" command, and HELP,/ROUT
doesn't show it. Can anyone shed some light on this?
