> Our professor is nonexistent (unreachable, no course material etc) so please think of this as I'm just a person who knows nothing about IDL, has Google, and the IDL workstation in front of me to try things out.

At first I thought this professor was a cold, heartless
bastard for making his students do an assignment with
the TV command, for God's sake. Then, I realized the
genius of his method. This assignment isn't SUPPOSE to be
completed! It is just to show his student's how pointless
it is to use these old IDL commands.

In the second lesson, he will introduce them to the
Coyote Library, and all will be well, This assignment,
for example, can be done in four simple commands! ;-)

Cheers,

David
