i have this variables into my project:

```
GRID_SPACING  INT    = Array[2]
IM            UINT    = Array[2048, 2048]
INFO          STRUCT = -> <Anonymous> Array[1]
STR           STRUCT = -> <Anonymous> Array[1]
TABLAT        FLOAT  = Array[881, 849]
TABLON        FLOAT  = Array[881, 849]
```

im is a image, tablon is longitude and tablot is latitude. i have the spacing grid(gri_spacing), its 10.
i want use this variables for create a georeferencing image. can be any raster format.

i appreciate your help, ;D.
