Subject: Five Million Page Downloads on Coyote's Guide
Posted by David Fanning on Tue, 11 Dec 2012 16:49:55 GMT

Folks,

Wasn't it just a couple of months ago that we were talking
about a milestone of 1 million page downloads on Coyote's
Guide to IDL Programming? As a program is churning away
this morning, I was looking at web site statistics.
Sometime in the next 20-30 days the web page will hit
5 million page downloads. Wow!

On the other hand, only three people have downloaded
by e-book about my experience in the Arctic (none of
them a family member, alas!).

I would say it's pretty clear what kind of writing
I should stick to. :-(

Cheers,

David

P.S. If you are looking for a wonderful Christmas
present, I have about 10,000 copies of a wonderfully
cold account of a science adventure in my garage that
I am happy to allow you to re-gift for all your
e-book reading friends!
