> Hi all I have a program the can do mapping. I need help , I want to plot a field of view of the radar in the map. Field of view its like a big triangle but at the two end points form something like curve to merge those points. I do nt hv any idea how to make that kind of curve. I used plots to make triangle (FOV). Hence its not a pure triangle , can you help on making that kind of curve! I have been looking for some kind of routine but I dnt get any help. All suggestions all welcome. Thank you in advance for ur time!!

Hi all, thank for your response!!
I still need help, based program above
Radius=180 km
Ang1=3.24
Ang2=52
When I include device I got a big field of view similar to the one I am looking for, but located in wrong place.
When I removed device, I can located the field of view in a right place, but not big as I want, if its big, I donot get that arc(circle) between the last two points.
Please help me with suggestion, I real need to fix this, I have trying but I am not winning.
Many thanks
Zolile
