
Subject: Segfault opening graphics window

I'm trying to run idl 7 on a 64 bit system running ubuntu 12.10. idl fails whenever I try to open a graphics window:

```
IDL> window,/fr
```

```
idl: brw_program.c:261: brwInitFragProgFuncs: Assertion `functions->ProgramStringNotify ==  
_tnl_program_string' failed
```

Does anyone have a fix for this?

Alan
