JS Anand writes:

> I found some old posts in this newsgroup referring to a program called, "lonlat2reg.pro" created by Peter Alberts as part of a map_image library that I would like to try out. However, the site containing this library (<http://wew.met.fu-berlin.de/idl/>) appears to be long dead. Can a copy of this library still be found online somewhere?

I'm not sure what you are trying to do, but if you just want to map lat/lon data to a regular grid, this article might provide some insight:

http://www.idlcoyote.com/code_tips/usegriddata.html

Cheers,

David
