Subject: Link to Peter Alberts' old map_image library? (lonlat2reg.pro code request)

I found some old posts in this newsgroup referring to a program called, "lonlat2reg.pro" created by Peter Alberts as part of a map_image library that I would like to try out. However, the site containing this library (http://wew.met.fu-berlin.de/idl/) appears to be long dead. Can a copy of this library still be found online somewhere?

Cheers,

JS Anand
