---

Hi all.

Does anyone know of a good way to write text with an overbar covering more than one letter? For example, for an overbar over one letter 'A' I have been using the command `!sA!r!a-!n`. What should I do for a single overbar over two letters 'AB'?

I have tried `!sAB!r!a-!n` and `!sAB!r!a--!n`, but none give me what I want. Does anyone have any ideas???

Thanks
