I have a different workaround, I just insert empty (comment) lines where I want line breaks.

Like this:

```
; :RETURNS:  
;  
; -1 IF xUTC1 < xUTC2  
;  
; 0 IF xUTC1 == XUTC2  
;  
; 1 IF xUTC1 > XUTC2  
;
```

Proper lists would sure be useful, though.
