Here's my (horrible) fix for the problem of lines not showing up (or being dashed) when using the Z-buffer.

Use THICK=3 when plotting the surface.

The result has lines just about everywhere that they're supposed to be, and doesn't look too smeared. THICK=4 or =5 makes all the lines show up, but it looks like it was drawn with a crayon, so that's not so hot.

Brian Jackel
