Subject: continuum normalized spectra
Posted by abc on Sat, 02 Feb 2013 18:37:35 GMT

Hi All,
      I want to write a program to fit a linear local continuum of absorption line, and plot the spectrum with continuum drawn and the spectrum normalized by the continuum. And than I want to Fit a local continuum using data in the wavelength ranges 1800-1820 and 2020-2040 angstroms.

Does anyone know that how can I do that

thanks
