Hey, i'm jigar from india, working on ENVI + IDL.....ENVI_DO_IT function working properly which example given in help but my own data i cant rasterize.

in my ascii file, there id x,y and z as

x->lat

y->long means location

z->temperature data

i have upto 150 data each x y and z in example there is given that...

 $x_pts = [0, 500, 500, 0, 250]$

 $y_pts = [0, 0, 500, 500, 250]$

 $z_pts = [0, 100, 200, 300, 1000]$

now i have to assign all lat, long points to x and y and assign temperature data to z_pts.... am i write?

but my problem is that how to assign my x,y and z data which i have in form of

x-> image.x

y-> image.y

z-> image.z

but how i can assign that all x,y,z into x_pts, y_pts and z_pts???? plz reply me soon

reply me as soon as possible on jpdavra@gmail.com
