Hi,

I want to add the legend in the plot. And for making plots I am using cgZplot. But I don't know how to add legend with that. This is how I am doing but it doesn't work.

```
oplotObj = Obj_New('CGOVERPLOT',a,b,color='red')
cgZplot,c,d,color='black',OPLOTS=oplotObj
legend,['Temp','Days'],linestyle=[0,0],color=['black','red']
```

Does anyone know how to do that
thanks in advance
