I'm working with IDL. Version 4.0.1 (AIX ibmr2) on a UNIX Sistem.
I've developped some routines by myself and I would use them not
locally!, I'd like to put all my routines in a directory and then
call and compile everyting from everywere in my filesystem.
Can anyone help me?

PS In my filesystem I can't use the superuser permission, so I can't write anything in the main IDL
lib directory!!!.

Thanks in advance.

My best
