Subject: Re: Storing data in an array inside a structure MUCH slower in IDL 8.2.2 Posted by markb77 on Thu, 21 Feb 2013 15:17:15 GMT

that's scary. I would hate to inadvertently use a structure like this in my code which could cause such a slowdown. What changed between IDL 8.1 and 8.2 which could account for this? Even in 8.1 we already have the 'dot' operator for accessing object methods...?

any response from Excelis?

Mark
