Subject: ps to jpeg conversion
Posted by mkmvarma on Thu, 28 Feb 2013 17:46:11 GMT

Hello,
I am using coyote graphics to convert a ps file into a jpeg file but it fails to convert it and shows a
message that imagemagick is not installed. I am using a MAC and I have installed imagemagick
but not through macports. Looks like the program is not able to find the convert command. Can
anyone help me with this?
Thanks
