Hi David!

Thanks for the comments.

The images I'm working on are not the same (and therefore, they have different dimensions and scales).

Here you can see the original image from which I get the contours:

<https://dl.dropbox.com/u/6573328/teodoro2.jpg>

The image on the left is the original, non-rotated HST image. On the right you can see how this image should be regarding my iso-velocity one.

m.
