This works for me:

```
IDL> x=dindgen(100)/10.0d
```

```
IDL> y=x^2
```

```
IDL> plot, x, y, title='!16 This is the title',charsize=3.0
```

The title of the above is definitely in Cyrillic characters. The mapping of character->meaning is undoubtedly wrong, but at least you have access to the character set.

cheers,

paulv

p.s. I'm amazed it worked, actually. I would've thought IDL would have switched to Hershey font #1.
