Subject: IDLnetURL Put method
Posted by Helder Marchetto on Wed, 20 Mar 2013 09:15:55 GMT

Hi,
I'll start out saying that I'm not sure I know what I'm doing... However, I was wondering if there is a way to fill in a form in a webpage and then "click" a button. I was guessing that this could be done with the IDLnetURL object and then using the put method, but I'm not sure if that is possible at all. I could start off by making my webpage and then trying this out, but that would take quite some time...

Thanks,
Helder
