Subject: Rotating Tickmark labels
Posted by dgwenzi on Wed, 27 Mar 2013 17:57:06 GMT

Does anyone know a simple way of rotating the Tickmark labels on a plot without using a complicated for loop?. I am guessing there is a simple key word that should do it. I tried [XYZ]Text_Orientation, it didn't work, or rather I could get it to it work. Thanks in advance!!
