You mean something like this?

```
c_var = make_array(544,8, /byte)
my_struct = {a:1, b:2, c:c_var}
```

Same issue:

```
cmsave, data=my_struct, file='C:/Documents/test.sav', /verbose
% CMSAVE: CMSAVE version 1.16
% CMSAVE: CMSV Library version 1.7
% CMSAVE: Portable (XDR) SAVE/RESTORE file.
% CMSAVE: Saved variable: A.
% CMSAVE: Saved variable: B.
% CMSAVE: Expression must be named variable: <BYTE   (Array[544, 8])>
```
